# CT Cardiac Scoring

(Low Dose LDCT)

*What's your score?*

A Coronary Artery Calcium (CAC) Scoring CT Test can assess your risk of developing heart disease and may even show that you have a lower projected risk than anticipated.

Calcium is a marker of Coronary Artery Disease (CAD). The amount of calcium detected on a cardiac CT scan is a helpful prognostic tool. The findings on cardiac CT are expressed as a calcium score. Another name for this test is Coronary Artery Calcium Scoring.
