# CT Lung Screening (Low Dose LDCT)

The U.S. Preventive Services Task Force recommends a yearly lung cancer screening with LDCT for people who— Have a history of heavy smoking, and Smoke now or have quit within the past 15 years, and Are between 55 and 80 years old.

**Medicare Part B along with most insurances covers an annual lung cancer screening and LDCT scan for people who meet the qualifying criteria.**

- You are age 55-77
- You currently smoke or have quit smoking in the past 15 years
- You smoked or have smoked an average of one pack per day for at least 30 years
- You have no symptoms or signs of lung cancer
- You receive the screening and LDCT scan at a Medicare-approved radiology facility

*For Your Peace of Mind.*
